-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on election filed 6/16/2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

1. Claims 7-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/16/2005.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is not clear because it appears that something is missing in the phrase, "a coupling member... said vehicle body structure where in:".

Claim 3 is not understood since it is not clear what structure the claimed "flanges" extend from, either the "coupling member" or the "rear quarter inner member". It has been assumed that the flange extends from the "coupling member".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Roehl et al. (6,241,309).

Roehl et al. disclose a coupling member (20) that connects the rear quarter inner member (12) to an upper surface of said rear suspension base member (16). The coupling member is made of plate members that form a closed cross sectional structure, as shown in Figure 1.

In reference to claim 2, members (19,25,44) connect the opposing wheelhouse inner members, as shown in Figure 1. These members (19,25,44) forms a closed cross sectional structure with the coupling members (20) and provide a surface that faces the vehicle's interior such that it may support a seat back of a vehicle seat. In reference to claim 3, a reinforcing member (41) is shown in Figure 2 to have an open side. The reinforcing member (41) extends in the vertical direction and is joined to the rear quarter inner member (12). The coupling member (20) connects to the rear quarter inner member (12) such that vertical flange (32) coincides with an edge of the reinforcing member (41). In reference to claim 4, a coupling member (19,44, 20) forms a closed cross sectional structure that extends in a width direction of the vehicle and connects the upper surfaces of the rear suspension base members (16). The coupling member includes a seat back inner member (25) that is joined to the wheel house inner member and can support a seat back of a vehicle seat. The seat back inner member forms part of the closed cross section of the coupling member. In reference to claim 6, the coupling member includes a shelf (15) that forms part of the closed cross section of the coupling member.
